

PRESENTATION ON PROJECT REPORT

Online Attendance Management System

By

Shamith

Nishanth

PROJECT OVERVIEW

Student attendance management system deals with the maintenance of the student's attendance Details. It generates the attendance of the student on the basis of presence in class. It maintaining Daily basis of attendance.

The staff handling the particular subject to responsible to make the attendance for all students . the student attendance report based on monthly and consolidate will be generated

PURPOSE

The purpose of developing attendance management system is to computerized the tradition way of taking attendance. Another purpose for developing this software is to generate the report automatically at the end of the session or in the between of the session.

SCOPE

The scope of the project is the system on which the software is installed, i.e. the project is developed as a web application, and it will work for a particular institute. But later on the project can be modified to web application to app development.

REQUIREMENT SPECIFICATIONS

Software Requirements:

Browser : **Google Chrome, Mozilla, Firefox, Safari**

Front-End Language: **HTML, CSS, JS**

Back-End Language: **Mysql, PHP, JQuery**

DATABASE TABLE

Server: 127.0.0.1 » Database: attendance » Table: student

Future enhancement

The project has a very vast scope in future. The project can be implemented on intranet in future. Project can be updated in near future as and when requirement for the same arises, as it is very flexible in terms of expansion. With the proposed software of database Space Manager ready and fully functional the client is now able to manage and hence run the entire work in a much better, accurate and error free manner.
